Profile

I am a Software Engineer with over 3+ years of experience in developing fullstack applications, specializing in both frontend and backend technologies. I have a strong foundation in building scalable APIs and enhancing user experiences through modern web frameworks like React, Redux, and Node.js. My passion lies in solving complex problems and delivering innovative software solutions. I thrive in collaborative environments, working closely with cross-functional teams to achieve project goals while continuously improving my skills and knowledge.

Skills

Primary: ReactJs, NodeJs

Secondary: Nodejs, Express, Koa, Postgres, Docker, Javascript, TypeScript, Redux

Education

B.Tech

Walchand College Of Engineering,
Sangli

Passing Year: 2022

Score: 7.4

Experiences

Software Engineer

Josh Software Pvt. Ltd

📅 January 2022 - Present

Projects

ITACO

📅 May 2025 - Present

Project Description: ITACO is a service management platform where customers can request a variety of professional services, such as vehicle-related assistance or home services. The platform allows administrators to configure and manage service categories, custom pricing, service availability by location, and the association of services with different offices and units. It also provides a streamlined experience for users to submit service requests, track their status, and handle payments.

Role: Frontend Developer

Responsibility:

- Developed responsive and dynamic frontend components using React, TypeScript, and Material UI.
- Integrated various features including service request flows, custom pricing, and package selection.
- Participated in code reviews and ensured the application's accessibility and performance.

Project Techstack: TypeScript, React, Material UI, Google Maps APIs, Java, Spring Boot, PostgreSQL

Technology Worked On: TypeScript, React, Material UI, Google Maps APIs

MINT (Star India)

📅 September 2024 - April 2025

Duration: 0.7 years

Project Description: Platform to Create and Manage Advertisements Compensation To the Clients

Responsibility:

- Developed and integrated new modules and features into the MINT application.
- Migrated legacy code and modules to a modern frontend stack, improving UI/UX consistency and overall application performance.
- Contributed to building reusable components and enhancing the frontend architecture for better maintainability and scalability.

Project Techstack: Reactjs, React Query, Redux, Ruby On Rails, Postgres

Technology Worked On: Reactjs, React Query, Redux

Novoguild

📅 October 2024 - November 2024

Duration: 0.2 years

Project Description: Hiring Platform To Help Score Students Based on Education, Experience and Skills

Responsibility:

- Developed a web application for parsing and scoring candidate resumes based on education, experience, and skillsets.
- Implemented resume upload, parsing, and structured data extraction features to evaluate candidate profiles effectively.
- Designed and developed RESTful APIs to automate the resume parsing and scoring process, enhancing recruiter decision-making.

Project Techstack: Reactjs, Nodejs, Express, Postgres, PDF Parser

Technology Worked On: Reactjs, Nodejs, Express, Postgres, PDF Parser

Dubai Technologies

📅 March 2024 - August 2024

Duration: 0.6 years

Project Description: A Low Code - No Code Platform to Design and Deploy Web Apps

Responsibility:

- Collaborated on developing a Low-Code/No-Code platform enabling users to design and deploy web applications using tools like form-builder and workflow manager.
- Contributed to the form-builder, allowing users to drag and drop UI components to create custom screens or widgets.
- Facilitated the creation and management of automated task sequences with the workflow manager to streamline web application creation and management.

Project Techstack: Typescript, Reactjs, Redux Toolkit, AntD, React Query, DnD Kit, Golang, Postgres

Technology Worked On: Typescript, Reactjs, Redux Toolkit, Antd, React Query, Dnd Kit

TABSME

📅 November 2023 - February 2024

Duration: 0.4 years

Project Description: Axis Bank's Mobile Application to Open Current Account (Signzy)

Responsibility:

- Developed REST APIs to initiate and oversee the approval process for POS machine applications.
- Prepared comprehensive Software Requirement Specifications (SRS) for new business requirements, including design elements with feature flow diagrams and development processes.
- Implemented secure REST APIs for the effective initiation, management, and monitoring of POS machine approval processes in the banking sector. Committed to industry best practices and robust security protocols.

Project Techstack: Flutter, Nodejs, KoaJS, MongoDB, PM2, Jest

Technology Worked On: Nodejs, KoaJS, MongoDB, PM2, Jest

Coffee Curtain Up

📅 August 2023 - October 2023

Duration: 0.25 years

Project Description: Web Applications for New York Curtain Up Event

Responsibility:

- Developed end-to-end REST APIs for three web apps, covering event and venue management, news, users, and seamless image uploads to AWS S3 and Google Drive. Also, implemented user-friendly email confirmations.
- Collaborated on APIs and integrated Google Analytics to analyze user interactions, gaining valuable insights for optimizing website performance and achieving business goals.
- Conducted thorough code reviews, providing constructive feedback and ensuring code quality.
- Actively contributed to a collaborative and innovative development environment, mentoring junior team members and fostering continuous improvement.

Project Techstack: React, Nodejs, Express, MongoDB, AWS S3, AWS SES, Box Drive SDK

Technology Worked On: React, Nodejs, Express, MongoDB, AWS S3, AWS SES, Box Drive SDK

Practus Digitization

📅 January 2023 - July 2023

Duration: 0.7 years

Project Description: Consists of various tools to help organization

Responsibility:

- Designed and developed the whole UI for 3 out of 4 tools from scratch.
- Wrote generic components resulting reduced development time.
- Also Designed and developed RESTful APIs to conduct and score surveys, to collect and manage the candidates data.
- Enabled Microsoft Azure SSO to access the tools for internal member of organization along with credentials based authentication.

Project Techstack: React, Redux, Nodejs, Koa, Postgres, Sequelize, Jest

Technology Worked On: React, Redux, Nodejs, Koa, Postgres, Sequelize, Jest

Mekari

📅 January 2022 - December 2022

Duration: 1 years

Project Description: A digital enabled platform for money lending services.

Responsibility:

- Contributed to the development of a web platform for tracking applicant KYCs, managing loan disbursements and repayments, and overseeing wallets for various loan types.
- Played a key role in developing and maintaining critical modules, including the 3 Step KYC Process, OTP, and Wallet features.
- Implemented unit tests to ensure the reliability of the developed features.
- Collaborated within a team environment, ensuring the successful delivery of a high-quality project.

Project Techstack: Nuxtjs, Vuex, Jest, Ruby On Rails, Postgres

Technology Worked On: Nuxtjs, Vuex, Jest
